

KAPLAN DIAGNOSTICS

Financial Literacy

Identifying risk. Optimising development.

Are your people making the right call with company money?

As a business leader, you know that every decision made within an organisation affects its financial health – directly or indirectly. It is critical that everyone is financially literate in order to make the right commercial decisions, even those who “don’t do numbers”.

You can’t prepare for every scenario, but if you have a clear, provable understanding of where risk lies in your organisation, you can mitigate it efficiently and successfully.

KAPLAN

WHAT IS IT?

Kaplan's Financial Literacy Diagnostic allows you to identify risk quickly, using relevant scenarios to assess the competence and confidence of your workforce, and deliver accurate results with detailed recommendations on how to act.

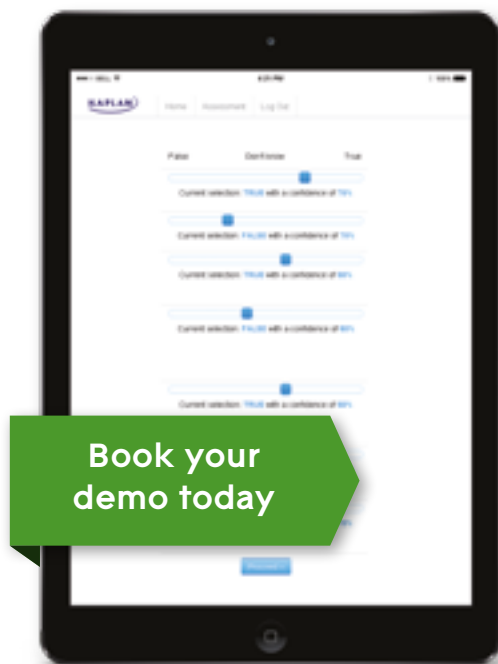

Key questions:

- ▶ *Are you confident that everybody in your organisation understands the financial implications of their decisions?*
- ▶ *Is your company losing money because of poor financial decisions?*
- ▶ *Can you trust your people to make the right call?*
- ▶ *Are you too worried to let your people make commercial decisions and, in doing so, inhibiting potential growth?*

By answering these questions honestly, you will identify risks and opportunities in your business.

HOW DOES IT WORK?

The Financial Literacy Diagnostic is an online self-assessment survey that measures and reports on financial literacy within your organisation at every level.

Our tool presents business scenarios and poses two simple, but key, questions: Do you know the answer? How confident are you that your answer is correct?

With a few complex algorithms and a wealth of expertise, we will analyse the answers to give you a clear picture of who is likely to be spending business money wisely, and who is a risk to your organisation's financial health. This then empowers us to efficiently target who needs training and development, and in which areas they need it most.

With the Financial Literacy Diagnostic you can:

- ▶ *Prioritise and direct learning and development interventions with a laser focus to where it's needed, optimising your budget and avoiding waste*
- ▶ *Identify financial risk – highlight people that are highly confident but making incorrect financial decisions*
- ▶ *Detect hidden talent – identify people with high competence but low confidence*
- ▶ *Provide a flexible and commercially relevant 'before and after' benchmarking capability*
- ▶ *Benchmark individuals, offices, branches and teams – internally and against other organisations – with clear and relevant individual reports and collective volume heat-maps*

KAPLAN DIAGNOSTICS

Whether you want to identify risk, appraise capabilities or evaluate a programme, the Kaplan Diagnostics range helps to optimise L&D spend, empowering you to focus on those who need it the most, in the development areas they need.

From self-assessment tests to confidence-based learning questionnaires, our digital assessment environment measures and reports on what is important to your organisation.

With real-time insights on risk areas, hidden talent and learning trends, Kaplan Diagnostics will enable you to efficiently identify the champions of your organisation and barriers to its success.
